命令 6：扩展词汇量

记单词最高效的方法

扩展词汇量的关键是要在语境中去记忆单词，而不要去死记硬背孤立的单词列表。从句子或文章中接触和记忆单词是最有效的增加词汇量的方法。

另外，按话题分类记忆相关联的单词效果更好。对于备考各种英语考试的考生们来说，可以专注于考试高频话题的相关词汇和搭配并分类突破。比如雅思大作文的一个高频话题是科技，雅思考生就需要在平时的阅读中特别留意科技类的主题词汇。

借助 ChatGPT，雅思考生可以很容易的精准聚焦高频话题，在高质量例句和范文中接触和记忆好的主题词汇和搭配，让记忆负担降到最低，最快速高效的提高词汇量和雅思写作的分数。

应用场景 1

下面以剑桥 16 的一个大作文题目为例，演示整个和 ChatGPT 交流的过程：

1. 首先，让 ChatGPT 列出 N 个和这个题目有关系的学术词汇或搭配；
2. 然后，对应显示每个词汇/搭配的中文含义；
3. 然后，给每个词汇/搭配造句；
4. 然后，对应显示每个句子的中文含义；
5. 最后，写一篇包含这些词汇/搭配（用方括号[]标注）的范文

   减少人为错误是无人驾驶车辆的关键优势之一。
5. Technological advancements - Technological advancements in autonomous vehicles will change the way we travel in the future.
   自主驾驶车辆的技术进步将改变我们未来的旅行方式。

Write a model IELTS essay using the above words/colloactions to the above prompt, labeling the above words/colloactions with []

In recent years, there has been an increasing amount of discussion about the future of transportation and the potential for all vehicles, including cars, buses, and trucks, to become driverless. While this prospect certainly raises some interesting questions, it is important to consider both the advantages and disadvantages of such a future.

One of the key advantages of [autonomous vehicles] is that they have the potential to greatly increase [transportation efficiency]. By removing the need for drivers, vehicles would be able to run more smoothly and efficiently, reducing traffic congestion and travel times. Additionally, [human error reduction] is another significant benefit of driverless vehicles. It is widely recognized that the majority of accidents on the roads are caused by human error, and by removing this factor from the equation, we can reduce the risk of accidents and save lives.

However, there are also some significant disadvantages to consider. For example, [technological advancements] in the field of autonomous vehicles have been rapid in recent years, but there is still much uncertainty about the reliability of these systems and the safety of passengers. Additionally, there are concerns about the loss of jobs for drivers, as well as the potential for the misuse of driverless vehicles.

In conclusion, while there are certainly some advantages to [passenger-only transport] and [autonomous vehicles], it is important to consider both the benefits and the potential drawbacks. Ultimately, it will be up to society as a whole to weigh the pros and cons and determine whether the benefits of driverless vehicles outweigh the disadvantages.

这样，考生就得到一份雅思写作高分主题词汇的完美语料，作为学习和记忆的资料。再根据自己的时间安排，对每个高频话题都选择几个真题做同样的练习，达到最精准，记忆负担最小化的扩展词汇量的目的。

Part 2：产生 idea 和 idea 的扩展

切题的 idea 和充分的扩展是拿雅思写作高分所必须的，但要做到这一点却不是那么容易。不少同学面对题目，特别是自己不熟悉的话题，无从下笔，不知道写什么。

ChatGPT 的出现彻底解决了这个问题。因为它是百科全书，没有它不熟悉的话题。面对任何的作文考题，ChatGPT 都能秒速给出源源不断的 idea 和扩展的方式。

但是，为了达到最好的学习效果，我们不能无脑的拷贝粘贴。我建议的学习步骤是：

1、面对一个作文题目，先自己思考 idea;

2、再参考 ChatGPT 给出的 ideas，选择自己认为最切题，也最容易扩展的 idea 来写；

3、idea 确定以后，先自己思考怎么扩展；

4、再参考 ChatGPT 扩展的写法，选择自己认为最充分，最有说服力的扩展方式。

5、按上面的方法把高频话题过一遍，并记下来对应的 idea 和扩展思路，定期温习。

Part 6：雅思阅读

命令 1： 文章疑难词句解释（中英对照）

命令：Explain what "[word/expression/sentence]"means in the following article in both English and Chinese: [article]

解释： 根据上下文解释文章中不懂的单词/短语/句子的意思（中英对照）。

示例：剑桥 17 TEST 1 Reading Passage 1

Explain what "coincided with"means in the following article in both English and Chinese:

Amongst the most vocal advocates for a solution to London's traffic problems was Charles Pearson, who worked as a solicitor for the City of London. He saw both social and economic advantages in building an underground railway that would link the overground railway stations together and clear London slums at the same time. His idea was to relocate the poor workers who lived in the inner-city slums to newly constructed suburbs, and to provide cheap rail travel for them to get to work. Pearson's ideas gained support amongst some businessmen and in 1851 he submitted a plan to Parliament. It was rejected, but coincided with a proposal from another group for an underground connecting line, which Parliament passed.

输出：

"Coincided with" means that something happened at the same time as something else. For example, in the article, it states that Pearson's plan was rejected, but it coincided with a proposal from another group. This means that Pearson's plan was rejected, but at the same time, another group also presented a proposal.

"Coincided with" 意思是某事发生的同时又发生了另一件事。例如，文章中指出 Pearson 的计划被拒绝了，但它与另一个团体的建议同时发生了。这意味着 Pearson 的计划被拒绝了，但同时另一个团体也提出了一个建议。

4. If I could learn more about any period in history, I would choose the Tang Dynasty in ancient China. This was a time of great artistic, cultural, and economic prosperity in China, and I find the stories and legends of that time period to be particularly fascinating. become interested in finding out about the history of the house or building they live in. This essay will explore the reasons for this trend, as well as discussing the various methods people can use to research the history of their home.

There are several reasons why people may be interested in learning about the history of their home. One reason could be a personal connection or sentimental value to the property. For example, someone may have inherited the house from a loved one and want to learn more about its past. Another reason could be a desire to understand the cultural and historical context of the area in which they live. This could include learning about the architectural style of the building and the historical events that took place in the area. Additionally, some people may be interested in the history of their home for financial reasons, such as wanting to understand the value of the property or its potential as an investment.

There are various methods that people can use to research the history of their home. One way is to start by looking at local records, such as property deeds and building plans. These documents can provide information about the construction of the property, as well

as its ownership history. Another method is to visit local libraries and archives, where historical records and documents may be stored. This can include newspapers, maps, and photographs that can provide insight into the history of the area. Additionally, people can also conduct online research and use websites like ancestry.com or local history societies to learn more about the history of their home.

In summary, there are a number of reasons why people may be interested in finding out about the history of their home, including personal connections, cultural and historical context, and financial considerations. To research the history of their home, people can look at local records, visit libraries and archives, and conduct online research.

Dear Sir or Madam,

I am writing to express my concern about the current living arrangement I have in the college. I live in a room that I share with another student, but unfortunately, this arrangement has been causing me a great deal of difficulty.

[Eric 老师的课程和书籍购买链接](#)

The main problem I have encountered is that my roommate and I have very different schedules and habits. While I prefer a quiet and organized environment for studying and working, my roommate often has friends over late at night, causing a lot of noise and disruption. Additionally, my roommate has very different standards of cleanliness, which has led to conflicts over the shared space.

As a result of these issues, I have found it extremely difficult to focus and get any work done in my current living situation. I have tried speaking with my roommate about these concerns, but they have not been able to make the necessary changes to create a more suitable environment for me.

I am hoping to request a change in my accommodation to a single room, where I can have the space and peace of mind necessary to focus on my studies. I understand that this may not be possible, but I wanted to bring this to your attention and see if there are any options available.

Thank you for your time and consideration. I look forward to hearing from you.

命令：Write a model TOEFL essay of at least 300 words about the following topic: Do you agree or disagree with the following statement? Television advertising directed toward young children (aged two to five) should not be allowed.

范文：

Television advertising directed toward young children (aged two to five) has long been a controversial topic, with some arguing that it should not be allowed due to its potentially harmful effects on children's development, understanding, and well-being. Personally, I agree with this statement and believe that such advertising should be banned.

One reason why I support this position is that children in this age range are not yet developmentally capable of understanding the persuasive intent of advertising. They may see an advertisement for a toy or other product and believe that it is something they simply must have, without fully understanding that the purpose of the advertisement is to persuade them to make a purchase. This

[Eric 老师的课程和书籍购买链接](#)

can lead to unnecessary and inappropriate pressure on parents to buy products that their children may not even need or want.

Another reason why I believe that television advertising directed toward young children should not be allowed is that young children are still in the process of learning about the world around them and have limited experience and knowledge to draw upon. They may not be able to critically evaluate the accuracy or validity of the claims made in advertisements, which can lead to confusion and misunderstanding. For example, an advertisement for a particular brand of cereal may claim that it is the "healthiest" option, but this may not be true. Without the necessary critical thinking skills to question such claims, young children may believe them to be true and make inappropriate choices as a result.

Furthermore, the constant exposure to advertising can have negative impacts on children's overall development. Research has shown that excessive screen time can lead to problems with attention and concentration, as well as disrupt sleep patterns. It can also contribute to the development of unhealthy habits, such as overeating and sedentary behavior. While it is important for children to learn about the world around them and to be exposed to a wide

Eric 老师的课程和书籍购买链接

range of experiences, it is also important to protect them from potentially harmful influences such as excessive screen time and inappropriate advertising.

In conclusion, I believe that television advertising directed toward young children should not be allowed due to the negative impacts it can have on their development, understanding, and well-being. Protecting children from inappropriate and potentially harmful influences is the responsibility of both parents and society as a whole, and banning such advertising is one way to do so.
